RUCHI DUBEY

Creative, motivated, result oriented, self-driven professional with more than 11 Years work experience in Java/J2EE development, End-to-End Automation and Configuration Management in virtualization, cloud monitoring, Mobile, Banking and Insurance domain

MTS2 | DevOps Engineer | Product Developer
Phone: +91-9971352888
Email: ruchi.dubey29@yahoo.com
Bio: http://www.linkedin.com/pub/ruchi-dubey/33/309/550

Summary:

- Experienced Senior Member in an End-to-End Automation team with a strong background in virtualization and cloud monitoring domain. Designing, developing, and delivering API and UI automation frameworks for VMware Aria Hub, a cloud management and monitoring product. The API framework is based on Java and utilizes GraphQL API, incorporating Netflix-based DGS client for automating customer scenarios. The UI automation framework is written in TypeScript using page object model and Cypress.
- Skilled DevOps Engineer with hands-on experience supporting, automating, build profiling and optimizing mission critical deployments in AWS, leveraging configuration management, CI/CD, and DevOps processes.
- Strong Algorithms & problem-solving ability.
- Earlier Java Developer with development experience for banking & insurance domain like Swiss Reinsurance, American Express & Citibank.
- Worked on J2EE Frameworks like Struts, JSF and ORM based Persistence API framework like JPA, Hibernate.

Skills:

- **Technical Skills:** Tanzu Aria Hub suite provisioning and Policies (SaaS Product) - Multi-cloud Management Platform, Guardrail feature integration, Multi-cloud SDK(AWS, Azure, GCP), Appian Development, Build Automation, Build Profiling, Incremental Module Build System, Build Agent Management, CMDB, Perforce, Tortoise SVN, Git and GitHub for Version Control, Jenkin and QuickBuild for build Automation, Dynatrace for Prod Performance Monitoring, Collection, JSP, Servlets, Agile (Scrum), Multithreading, Excellent Debugging skills
- **Programming Languages:** Groovy, Core Java 11, XML, JavaScript, jQuery, HTML5, CSS3, TypeScript
- **DevOps Tools:** Quick Build, Dockers, Ansible, Kubernetes, Perforce, Git, Gerrit, Splunk, Cypress
- **Other Tools:** Tomcat, Eclipse, RAD, JIRA, SQL Developer, Tortoise SVN, VPMS, Matlab, Maestro Continuum, Thunderhead, SharePoint, Swarm, Review Board, etc.
- **Linux/Windows based environment**
- **Technology/Framework:** J2SE 5.0; 6.0, Hibernate, Maven, Ant, REST, JUNIT
- **Databases:** MySQL, SQL Server 2014

Experience:

- **October,2021 – Present, Member of Technical Staff- 2, VMware Inc.**

  VMware vRealize Automation, formerly called vCloud Automation Center, is a software product for unified cloud management. vRealize Automation provides the ability to provision and configure storage, network and compute resources across multiple private and hybrid cloud platforms. This multi-tenant solution can deploy VM's, Containers, multi-tier applications on various endpoints.
  - Leading the end-to-end delivery of Aria Guardrails, encompassing strategic test planning, accurate estimation, thoughtful design, robust automation framework development, and timely delivery.
  - Hands-on experience with CI/CD pipelines for seamless integration and delivery of both SaaS and on-premises products.
  - Collaborating with product management and customers to understand use cases and objectives, ensuring customer satisfaction.
  - Strong understanding of private and public cloud technologies, including vSphere, VMC, and AWS and Well-versed in working with distributed teams across India, Europe, and the US.
  - Involved in migration testing and upgrade from vRA 6.x to 7.x versions.
  - Have worked closely with customers for various bug fixes and customizations provided for individual customers.
  - UI and API automation of vRA test cases.
  - Worked on container service to deploy and manage docker container.
  - Experienced in working with Docker engines including container management, docker networks, native clustering using docker swarm.
- **2019 – 2021, Chief Engineer, Build Management team, Samsung Electronics**
  - Worked with Build Management team to make an echo system for developers to automatically sync, build, and publish projects automatically.

- Implemented incremental module build system for flagship project builds
- Kernel build automation
- Prepared configuration management database for tracking Software and Hardware asset in Samsung build agent management system frontend using React.js.
- Implemented build profiling to reduce build time
- Tool based Linux scripting experience (Tool: Quick Build- groovy based scripting)

- **2014 -- 2019, Senior Engineer, DXC Technology**

  Point in Java-Insurance Domain: POINT is DXC's propriety product. PIJ project was the migration of the Point application from AS400 to Java for harmonizing business and IT. Point was the majorly used application in North America by Clients like Swiss Re. This application includes Policy Processing, Quote Processing, Re insurance and Policy Issuance etc. (Hibernate, Core Java, Multithreading, XML, JSP, SQL SERVER, JavaScript, and Ajax)
  - Collaborate with Module leads/PMs for new feature planning, Design (LLD) and release Automation, Bugfix for the developed feature.
  - Size, Effort, Schedule & Resource estimation, planning and work item tracking
  - Wrote manifests and modules to deploy, configure, and manage servers.
  - Automated build and deployment using Jenkins to reduce human error and speed up production processes.
  - Reduced deployment time for critical agile project infrastructure from ~1 month to 4 days
  - Installed and configured Dynatrace to constantly monitor network bandwidth, memory usage, and hard drive status.
  - Managed GitHub repositories and permissions, including branching and tagging
- **2013-2014, Senior System Engineer, Java, American Express, Infosys Ltd.**

  Global Communication System: Project send out communications (Email and letters) to American Express customers regarding their cards/bank account includes retrieving data from external teams, validating processing and assembling the same in **Online** & **Batch** mode
  - Designed and Modified Java code for process validation and data retrieval.
  - MQ and Web service based communication with external system to fetch the required data for output generation

  (Struts, Hibernate, Core Java, Multithreading, Thunderhead, XML, UNIX, Business Object SDK.)
- **2012-2013, System Engineer Trainee, Infosys Ltd.**
  - Got selected in Fast track batch of training based on merit and completed the training in 4 months
- **July 2011- Aug 2011, Trainee, Accenture**
- **July 2010-July 2102, Campus Ambassador, Aspiring Minds**

Certifications

- **Domain***:* Investment Banking –Level 1
- **Technical***:* Infosys Certified Java Professional

Professional Achievements:

- During Infosys training selected in Fast Track Batch on performance basis.
- Got selected for Head Start Foundation Program of Accenture based on a test and an interview.
- Got various client appreciation for compliance of the projects deadline and quality.

Research Work:

- Novel **Keyless Algorithm for Steganography, IEEE Explore 2012**

Presented the paper at Students' Conference on Engineering & Systems (SCES 2012), MNNIT Allahabad

Education:

- **Galgotias College of Engineering& Technology,2008-2012**

  B.Tech (Information Technology) -72%
- **12th Standard(AISSCE),Central School,2008**

  PCM + Computer Science-73%
- **10th Standard(AISSE),Central School,2006**

  Secured 78%

Academic Projects:

- **Steganography Algorithm for standalone system**
  Tool Used: Matlab
  Developed a Steganography algorithm by modifying the least significant bit (LSB) substitution method. It's a robust algorithm as it's a keyless Steganography algorithm.
- **Ecommerce Website**
  Technology Used: JSP, MS ACCESS
  Developed a simple Ecommerce website for the publicity of goods.
- **Algorithm for Network Security(Core Java)**
  Coded the RSA algorithm as beginner in Core Java.

Academic Achievements:

- **Aspiring Mind Campus Ambassador**
  Conducted Seminars & Workshop for propagating the job opportunities amongst the job aspirants.
- **Placement Coordinator, Galgotias**
  Propagated Placement notices and conducted various seminars and sessions for placement preparedness for college students.
- **Conducted Technical seminars & Workshops**

Hobbies:

- Interest in history
- Travelling: A great travel companion and advisor.

Personal Details:

Date of birth	:	29th June 1990
Gender	:	Female
Address	:	B1401, Gardenia Grace, Sector 61, Noida (201301)
